Education

York University *Toronto, ON*
Honours Bachelor of Science in Computer Science *Expected May 2028*

- **Coursework: EECS 3101** (Algorithms), **EECS 4486** (Machine Learning), **EECS 3421** (Databases)

Professional Experience

Scotiabank May 2026 – Aug 2026
Cloud Engineering Intern *Toronto, ON*

- Developed **10+ reusable Terraform modules** for networking, storage, and IAM across **Azure and GCP**, provisioning 40+ cloud resources and reducing deployment time from **3 hours to 30 minutes**.
- Building over 20 GitHub Actions CI/CD workflows integrating **tfsec** and **Checkov** to automate infrastructure security checks, identifying **40+ misconfigurations** before deployment.
- Engineered a **Zero-Trust IAM/RBAC** architecture for cloud workloads serving 100+ enterprise users, automating that process with 30+ over-permission identities .
- Audited **20+ Azure subscriptions** and **70+ VMs** for compliance, decommissioning **50 idle or non-compliant assets** to mitigate public attack surfaces

Tangerine Bank Sep 2025 – Apr 2026
SDET Intern *Toronto, ON*

- Developed and maintained automated API test scenarios within the **Velocity framework** using **Karate** and **Cucumber** to validate banking services and transactional workflows.
- Built **Selenium** UI regression tests and wrote **SQL queries** to extract and validate Customer Information File (CIF) records, reducing data retrieval time by **50%**.
- Developed an automated checkout audit-tracking system, reducing debugging time by **60%** for development and QA teams.

YU Blueprint Apr 2026 – Present
Vice President of Engineering *Toronto, ON*

- Lead an agile team of student developers to architect and ship **FixThe6ix**, a live, mobile-friendly tracking dashboard handling **50+ store brands** and **100+ gift cards** for local non-profit field operations.
- Developed **Next.js API routes** with **Prisma** and **PostgreSQL**, implementing duplicate detection and bulk **CSV imports** to streamline gift-card data management.

Projects

Eco-Map Hackathon Winner | *GPT API, Google Maps API, Express.js, MongoDB*

- Engineered an AI-powered chatbot combining **GPT API and Google Maps** to deliver real-time eco-friendly route recommendations, **reducing carbon footprint by suggesting sustainable transportation alternatives**
- Architected scalable backend using **Node.js and Express** with **MongoDB**, processing location queries **40% faster** than traditional routing systems through optimized database indexing.

Document Q&A Backend *Python, FastAPI, Cohere Command A+, REST APIs*

- Engineered an end-to-end **RAG backend** using **Python, FastAPI, and Cohere Command A+**, supporting PDF/DOCX ingestion, document chunking, and citation-grounded question answering.
- Implemented **hybrid retrieval** combining **Cohere Embed v4.0**, **ChromaDB**, and **BM25** with Reciprocal Rank Fusion (RRF); integrated **Cohere Rerank** to improve relevant passage ranking from **3rd to 2nd** in a retrieval test.

Technical Skills

Languages: Python, C, Java, TypeScript, JavaScript, SQL, C++
Frameworks: React, Node.js, Express, FastAPI, Spring Boot, PyTorch
Databases: Prisma, MongoDB, SQL Server
Testing: Selenium, Karate, Cucumber, JUnit, REST Assured
